Montezuma Valley

Has about 50,000 acres of the finest quality of soil. It has long been known as the largest, and in fact the only large body of good farming and fruit land in western Colorado. The different soils in all parts of the valley have been examined, and found uniformly good. Wheat, oats, barley, peas, potatoes, alfalfa, clover and many kinds of grass show a vigorous growth. It is the greatest.

Fruit Growing

Country in the world, setting floriculture wherever exhibited. Tobacco for all purposes is near and plentiful. Building stone can be had for the taking, and fuel is abundant. An irrigating district has never been discovered that possesses so many advantages for small holdings where the poor people can secure homes.

Town of Cortez

Cortez has the county seat, & $40,000 Court House and jail, & $8000 steel coke, fuel, general store, drug store, blacksmith shops, schools, splendid church, a lively stable, saloons, hotels, flouring mill, in fact, all the different branches of business and industry which go to make up a thriving town. It is an important commercial center, securing not only the trade of the valley, but has much of the flow and trade of other towns in San Juan county, Utah.

PATENTS

FOR INVENTIONS.

Send with the interest of those having claims against the government it is desired to obtain patents. There are many inventions of great value, which are not patented, because the proprietors do not have the time or the means to make the necessary drawings or to get them patented. This is a great loss to the public and to the inventors themselves, as they are unable to obtain the returns for which their inventions are worth. It is, therefore, desirable to obtain patents for such inventions. This can be done at any time, and is the best way to protect them. The government has all the necessary means to make the necessary drawings and to get them patented, but they do not do it. This is a great loss to the public and to the inventors themselves, as they are unable to obtain the returns for which their inventions are worth. It is, therefore, desirable to obtain patents for such inventions. This can be done at any time, and is the best way to protect them.
